Just goes to show you justice will be served. For SBC to try and rush something through the Illinois senate was ludicrous. SBC continues to try the legal avenue instead of competing. SBC and the RBOC's constantly refer to the last mile as theirs. Guess what? The government subsidized the last mile, the consumer paid for it and the RBOC's charge their competitors a fee for them, these guys are making a killing whether you believe it or not (SBC 5 billion in one quarter). This country has thrived because of an open market and competition. Save Linesharing!
